## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Election/Restriction***

It is noted that the claims have been renumbered according to rule 126.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 33-68, drawn to methods of transforming cells of a blood vessel wall and methods of treating angiogenesis comprising the direct administration of a vector *in vivo*, classified in class 514, subclass 44.
- II. Claims 31-32, and 69-104, drawn to methods of treating humans by site-specific installation of cells, classified in class 424, subclass 93.21.

The inventions are distinct, each from the other because of the following reasons: the direct administration of a vector encoding a therapeutic protein differs substantially from the therapeutic administration of cells transformed *ex vivo* in regards to the following issues: the ability of the vector to locate and transfect target cells *in vivo*, the stability of the vector under extracellular conditions, the capacity of the vector to stimulate immune responses, and the rate of vector clearance. Further, the methods of invention II broadly include the administration of both transformed and non-transformed cells such that aspects of invention II do not require the use of any vector. In addition, the methods of invention II read on treatment of any and all diseases in a human not envisioned in methods of vector delivery of invention I. Thus, in view of the different

biological and functional concerns regarding the administration of a vector to a host versus the administration of cells, the search for inventions I and II would not be co-extensive.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, different classification, and different search requirements, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication from the examiner should be directed to Anne Marie S. Beckerleg, Ph.D., whose telephone number is (703) 306-9156. The examiner can be reached Mon-Thurs and every other Friday from 9:30-7:00. If the examiner is not available, the examiner's supervisor, Karen Hauda, can be reached at (703) 305-6608. General inquiries should be directed to the group receptionist whose phone number is (703) 308-0196. The official fax number is (703) 308-4242.
